

Homework Ideas for students in U7

Independence Skills

The students in U7 will be developing independence skills and learning about safety in the kitchen by making their own dinner on Fridays. There are many opportunities for them to develop these skills at home. Students could make themselves or other members of the family breakfast. They could also assist in putting things out for dinner, which would also assist in developing their functional maths skills.

Maths

In Maths students are looking at different things and at different levels but we will all be practising functional Maths skills such as telling the time and using money. This can be practised at home by giving opportunities to pay for items when going shopping and getting them to tell you the time as well. Informing them regularly what time it is at key parts of the day would also be useful. Perhaps they could practice setting a timer when helping to make a meal.

English

For English we are looking at fictional texts and the main theme is "Witches" this term. If the opportunity arises to watch any of the Harry Potter movies or/and read the books during the evenings. And if time allows group reading with your child would be beneficial, asking them to read the occasional word, sentence or passage. Students could also try and write a diary. It could be a fictional or nonfictional diary.
