

# U4 Homework

Autumn Term 2019

Our topic for this term is **Vehicles**

As part of our topic work we are looking at vehicles. As always we will be planning lots of lovely trips out and accessing the local community as much as we are able to do.

We will be doing some work on shapes so please could you point out the different shapes that we see around us every day on vehicles and in nature. We are always working on counting. Some of the group are looking to count to 15 independently, others not that high. Wherever possible please count and when it is relevant, relate it to a task and give it relevance. We will continue to shop for our snacks every week for the purpose of making choices, money recognition and learning the actual value of our money. We will also be looking at ordinal numbers. Perhaps you can look at your position in queues and discuss if you are the first, second or third etc. You might be able to bring in a time element for example if you think you will be waiting for a short or long time.

Much of the work around accessing the community is about regulating how we behave when we are out and about, how to keep ourselves safe and who it is appropriate for us to speak with. This is quite a large concept when we break it down, with a grey area as to where it is polite to speak and how to keep ourselves safe; so if you could reinforce these things at home (as I am sure you do) it would be a great help.

I am very much looking forward to the fun and hard work we will be taking on this term and thank you for your help in this

Please do not hesitate to contact me or any of the class team if you want to know more about our plans or would like further ideas how to help your son at home.
