

Homework Ideas!

Class 8 – Autumn Term

In this first half term, our topic is adventures.

In English, we'll be looking at recounts and the lives of famous people who had dreams, as well as identifying our own.

In Maths, we're looking at number, fractions, decimals and measure.

Our History topic is about Newark and the Civil War.

In RSHE, we are doing work around being safe and friendships.

In Art, we are exploring the world of printing, and looking at the artist Andy Warhol.

English Research someone who has had a big dream and create a fact file on them.	<i>Read, read and read some more!</i> We recommend you try and read three times a week. This can either be a school reading book, or one of your own! We have a reading tree in class, so for every book you read, you put a leaf on the tree, and every leaf is an entry into a prize draw!	Maths Have a look at some maths games and test your skills! You could even make your own maths game using Scratch! Games BBC Bitesize
History Using books or the internet, research some interesting facts about the Civil War and create a fact sheet!	Art It's Autumn, so that means lots of leaves! Get some dried leave and make leaf rubbings!	Be mindful Modern life is fast paced. I know gaming and watching music videos are fun, but take five minutes away from them to relax your mind and body.

During the second half term, our topic will be "are you irresistible?", focusing on magnetism in science.

For English, we will be delving into the world of spooky stories and campfire tales, reading some books and writing our own stories.

In Maths, we will be continuing with number, fractions, decimals and measure.

For Careers, we are continuing to look at the skills we have, create CVs in alternative formats and identify jobs we would like to do.

In RSHE, we will be learning about health.

For Computing, we are exploring the use of green screen technology.

English Read some spooky stories, or watch films like Goosebumps to inspire your writing in class.	<i>Read, read and read some more!</i> Keep up with that reading! Whether it be a school book, home book or an instruction manual, get some reading done!	Maths Have a look at some maths games and test your skills! You could even make your own maths game using Scratch! Games - KS2 Maths - BBC Bitesize
History Go to the local library, or use the internet, to find out information about Newark Castle.	Computing Using websites or apps, have a play around with photo editing!	Careers We are looking at things we are good at and jobs. Help out at home by doing jobs around the house!

It would be great to receive any work/photos! Either send them in with your child, or email them over to me at joe.hayes@newarkorchard.notts.sch.uk
