

Class 10

Homework ideas Summer 2025

English

In English we are learning how to write information text. Our topic is about how helpful insects are to us and the environment. Try to read as much information as you can and tell us about it in class.

Read at home at least three times a week. Get your parents/carers to sign your diary and earn stars.

In class we are reading 'Bilal's Brilliant Bee' written by Michael Rosen. Do some research and find out what else he has written. He has written lots!!

Maths

The focus this term is money. Go shopping with parents/carers and help them work out what things cost and what your change is. If they have given you 50p change, what other coins could they have given you that is worth the same as a 50p?

Geography

The topic is 'weather'. Everyday talk about what is going on outside with regard to the weather. Is the weather the same all over the country/world?

Art

Our topic is 'sculpture'. When you go out and about see if you can spot any sculptures. What is it made of? What is it of? Is it large or small? Could you sketch it when you come into school? We could look it up and show the class.

Go outside and sketch your garden. Don't forget to only sketch what you see. What colours can you see? What insects can you see?

Science

Topic = properties and changes of materials

Look around your kitchen. What are things made of? Why do you think they have used that material?
