

H1 Summer 2025: Homework Ideas: All Creatures Great and Small / Safari, So Good

Maths

We continue to work on counting and writing numbers throughout all our work

Can you write number 1-10 / 1-30/ 1-100 and recall the order they go in?

Search for as many 2D and 3D shapes as you can in the house and garden. Use money when out in the community, looking at prices and the value of different coins.

Science and Geography—Plants

Try growing a plant or setting up a little allotment in the garden. Talk about what plants need to grow and then care for the plant over the summer term and beyond.

DT

Practice simple recipes and all take part in family cooking and all the aspects involved such as buying ingredients, following a recipe, baking and tidying.

English

Our English work this term is all about animals.

Get out and about and enjoy walks looking for animals and their habitats. Listen for sounds when out and about and play sound bingo.

Read together as many times as you can in a week! Discuss the character, plot and setting and talk about the job of the author and illustrator. Look through non fiction books about animals and compile facts .

RE

We are looking at what it means to belong. Talk about groups or clubs that family members attend. Make a poster to share with friends at school telling them about it.

PE

Get out and about as much as possible. Climb a tree, play a game, go on an adventure or nature walk. Take a selfie to share on Tapestry.

Remember to take a picture of your work and upload it to Tapestry so that we can share it all with your friends
